NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Fidelity and Guaranty Life Insurance Company of New York ("the Company") are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual, version effective January 1, 2001, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The Company follows these prescribed practices and does not use other permitted practices and, as such, there is no Risk Based Capital effect.

No significant change.

B. Use of Estimates in the Preparation of the Financial Statements

The preparation of financial statements in conformity with Statutory Accounting Principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities. It also requires disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the period. Actual results could differ from those estimates.

C. Accounting Policy

Life premiums are recognized as income over the premium paying period of the related policies. Annuity considerations are recognized as revenue when received. Expenses incurred in connection with acquiring new insurance business, including acquisition costs such as sales commissions, are charged to operations as incurred.

The amount of dividends to be paid to policyholders is determined annually by the Company's Board of Directors. The aggregate amount of policyholders' dividends is related to actual interest, mortality, morbidity, and expense experience for the year and judgment as to the appropriate level of statutory surplus to be retained by the Company.

In addition, the Company uses the following accounting policies:

(1) Short-term investments are stated at amortized cost.
(2) Bonds not backed by other loans are stated at amortized cost using the interest method, except for those bonds deemed to be other-than-temporarily impaired that are written down to estimated fair value and those bonds rated NAIC 6 which are carried at the lower of amortized cost or fair value.
(3) Common stocks are stated at fair value except that investments in stocks of uncombined subsidiaries and affiliates in which the Company has an interest of 10% or more are carried on the equity basis.
(4) Preferred stocks are stated at amortized cost except those preferred stocks rated NAIC 4 or lower, which are carried at the lower of amortized cost or fair value, or those preferred stocks deemed to be other-than-temporarily impaired which are written down to estimated fair value.
(5) The Company does not invest in mortgage loans.
(6) Loan-backed and structured securities are stated at either amortized cost or, for those securities rated NAIC 6, the lower of amortized cost or fair value. Loan-backed and structured securities that are deemed to be other-than-temporarily impaired are written down through the statement of operations to fair value or to the amount of the discounted estimated future cash flows. See Note 5D (5) for the circumstances that result in the recognition of an other-than-temporary impairment loss. The retrospective adjustment method is used to value all securities except for interest only securities or securities where the yield had become negative. These securities are valued using the prospective method.
(7) The Company does not own any stock of affiliated companies.
(8) The Company does not have any ownership interests in joint ventures, partnerships or limited liability companies.
(9) All derivatives are stated at fair value.
(10) The Company does not have any accident and health business.
(11) The Company does not have any accident and health business.
(12) There were no changes in capitalization policy during 2012.
(13) There are no pharmaceutical rebate receivables.

2. Accounting Changes and Corrections of Errors

A. In August 2011, the NAIC issued SSAP No. 101, "Income Taxes—A Replacement of SSAP No. 10R and SSAP No. 10". This Statement supersedes SSAP No. 10 and SSAP No. 10R and is effective January 1, 2012. Similar to SSAP No. 10R, SSAP No. 101 permits insurers to admit a higher amount of deferred tax assets if the insurer is subject to risk-based capital ("RBC") requirements or is required to file a RBC Report with its domiciliary state. Under SSAP No. 101, the amount of admissible deferred tax assets is based on the Authorized Control Level RBC computed without net deferred tax assets ("ExDTA ACL RBC"). If the insurer's ExDTA ACL RBC is greater than 300%, the amount of admitted deferred tax assets is capped at (1) federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse during a timeframe corresponding with Internal Revenue Service ("IRS") tax loss carryback provisions, not to exceed three years, plus (2) the lesser of (a) the amount of deferred tax assets expected to be realized within three years of the balance sheet date, or (b) 15% of statutory capital and surplus, plus (3) the amount of gross deferred tax assets that can be offset against existing gross deferred tax liabilities. If the insurer's ExDTA ACL RBC is between 200% and 300%, the insurer is required

to reduce the cap on deferred tax asset admissibility by (1) shortening the look forward period from three years to one year and (2) lowering the surplus ceiling from 15% of capital and surplus to 10% of capital and surplus. If the insurer's ExDTA ACL RBC is less than 200%, the insurer is not permitted to admit deferred tax assets based on a look forward period or percentage of capital and surplus. SSAP No. 10R permitted an insurer to increase the cap for the amount of admitted deferred tax assets if the insurer's RBC level was above (1) the RBC trend test if the insurer is subject to a RBC trend test, or (2) for those insurers not subject to a RBC trend test, a RBC above the maximum RBC level where an action level could occur as a result of a trend test (i.e., 250% for life insurers). SSAP No. 10R capped the amount of admitted deferred tax assets at (1) federal income taxes paid in prior years that can be recovered through loss carrybacks for existing temporary differences that reverse by the end of the subsequent calendar year, plus (2) the lesser of (a) the amount of deferred tax assets expected to be realized within three years of the balance sheet date, or (b) 15% of statutory capital and surplus, plus (3) the amount of gross deferred tax assets that can be offset against existing gross deferred tax liabilities. Under SSAP No. 10, the cap on the deferred tax asset admissibility is based on (a) a look forward period of one year and (b) a ceiling of 10% of capital and surplus. SSAP No. 10R also required that the increased amount of admitted deferred tax assets in comparison to SSAP No. 10 be reported as a separate component of gains and losses in surplus and as special surplus funds within the insurer's capital and surplus. SSAP No. 101 removes this segregation requirement for financial reporting and also changes the threshold for recording a tax loss contingency liability from "probable" to "more likely than not," a lower threshold.

The Company adopted SSAP No. 101 effective January 1, 2012. As a result of adoption, the Company reclassified the additional deferred tax assets admitted under SSAP No. 10R of $768,231 from special surplus funds to unassigned funds and reported the increase in unassigned funds as a cumulative effect of changes in accounting principle. Other than this reclassification within total surplus, the adoption of SSAP No. 101 did not have an effect on the Company's results of operations and capital and surplus.

3. Business Combinations and Goodwill

There were no business combinations completed during the year ended December 31, 2012.

4. Discontinued Operations

There were no business segments that were separated from continuing operations during the year ended December 31, 2012.

5. Investments

A. Mortgage Loans, including Mezzanine Real Estate Loans

The Company has no mortgage loan or mezzanine real estate loan investments.

B. Debt Restructuring

The Company is not a creditor in any debt restructurings.

C. Reverse Mortgages

The Company does not own any investments in reverse mortgages.

D. Loan-Backed and Structured Securities

(1) Prepayment assumptions for single class and multi-class mortgage-backed and asset-backed securities were obtained from dealer survey values and are consistent with the current interest rate and economic environment.

(2) The Company did not recognize any other-than-temporary impairments during 2012 related to the intent to sell the security or the Company not having the intent and ability to retain the security until its amortized cost is recovered.

(3) At December 31, 2012, the Company held the following loan-backed and structured securities with recognized other-than-temporary impairments as the present value of cash flows expected to be collected are less than the amortized cost basis of these securities:

(1) CUSIP	(2) Book/Adjusted Carrying Value Amortized Cost Before Current Period OTTI	(3) Present Value of Projected Cash Flows	(4) Recognized Other-Than-Temporary Impairment	(5) Amortized Cost After Other-Than-Temporary Impairment	(6) Fair Value at Time of OTTI	(7) Date of Financial Statement Where Reported

(4) The following table presents the unrealized loss aging for the Company's investments in loan-backed and structured securities at December 31, 2012 by length of time the security was in a continuous unrealized loss position.

a) The aggregate amount of unrealized losses:

1. Less than 12 Months $ -
2. 12 Months or Longer $ 224,375

b) The aggregate related fair value of securities with unrealized losses:

1. Less than 12 Months $ -
2. 12 Months or Longer $ 4,383,827

(5) If the fair value of a loan-backed or structured security is less than its amortized cost basis at the balance-sheet date, the Company determines whether the following circumstances exist and, if so, recognizes an other-than-temporary impairment loss:

- If the Company intends to sell the security or does not have the intent and ability to retain the security until its amortized cost is recovered, the security is other-than-temporarily impaired. A realized loss is recognized for the entire difference between the security's amortized cost and its fair value at the balance-sheet date.

- If the Company does not expect to recover the entire amortized cost from the present value of the security's future cash flows, it cannot assert it has the ability to recover the security's amortized cost even though it has no intent to sell and has the intent and ability to retain. The security is therefore other-than-temporarily impaired. A realized loss is recognized for the non-interest-related decline, which is the difference between the security's amortized cost and the present value of cash flows expected to be collected.

The Company did not have any repurchase agreements or securities lending transactions during 2011 and 2012.

7. Investment Income

A. Due and accrued income is excluded from surplus on the following bases:

Bonds - on bonds in default.

B. The Company did not have any due and accrued income excluded from surplus for 2012.

8. Derivative Instruments

A. The derivative instruments used by the Company expose the Company to potential credit loss in the event of nonperformance by counterparties. The amount of exposure is the fair value for such agreements with each counterparty if the fair value is in the Company's favor. The credit risk associated with these agreements is minimized by purchasing agreements from counterparties with NAIC designations of "1." Additionally, the Company maintains a policy requiring all derivative contracts to be governed by International Swaps and Derivatives Association ("ISDA") Master Agreements. The Company is required to maintain minimum ratings as a matter of routine practice in negotiating ISDA agreements. Under some ISDA agreements, the Company has agreed to maintain certain financial strength ratings. A downgrade

below these levels could result in termination of the open derivative contracts between the parties, at which time any amounts payable by the Company or the counterparty would be dependent on the market value of the underlying derivative contracts. In certain transactions, the Company and the counterparty have entered into a collateral support agreement requiring either party to post collateral when the net exposures exceed pre-determined thresholds. These thresholds vary by counterparty and credit rating.

At December 31, 2012, the total exposure for options owned was $1.2 million and the maximum exposure with any individual counterparty was $1.2 million. The total notional amount of the options held at December 31, 2012 was $93.0 million. The Company held no collateral at December 31, 2012 to mitigate the exposure of the options owned.

The derivatives used by the Company expose the Company to market risk (market movements). The Company's derivative portfolio is used to economically hedge the equity linked liability underlying its fixed indexed annuity ("FIA") products and, therefore, expects that movements in the fair value of the derivative portfolio would be offset by changes in the fair value of the hedged FIA liabilities.

B. The Company uses a static hedging program to hedge the equity linked liability underlying its FIA products. Over the counter equity call options are used to hedge market exposures of the liabilities with the objective of offsetting fair value changes. The indices underlying the options are the same indices referenced by the FIAs. With the static hedge program, the hedge is set at the beginning of the index credit period and rebalancing of the positions is not necessary. Static hedging exposes the Company to the risk that adequate capacity in derivatives markets may not exist to execute the strategy.

At December 31, 2012 and 2011, the Company held $124.1 million and $110 million, respectively, of reserves related to FIA contracts. The Company follows CARVM and Actuarial Guideline XXXV for the calculation of the embedded equity call option in the Company's FIA products. The reserve liability recognizes the change in the value of the index over the index period of the contract whereas the derivative instruments are marked to market at each reporting date, and in addition, the reserve liability is also not allowed to be less than the cash value or minimum guaranteed surrender value, thus creating a mismatch in declining equity markets.

C. Options are valued at fair value. The fair value of options are based upon valuation pricing models and represent what the Company would expect to receive or pay at the balance sheet date if the Company cancelled the options, entered into offsetting option positions, or exercised the options. Derivative instruments are marked to market through surplus (fair value accounting). Realized gains (losses) on derivative instruments are included in the Interest Maintenance Reserve and amortized into income over the remaining duration of the derivative contract. Long option positions are included in invested assets.

The Company does not have reportable information for items D through F.

Total assets at fair value	$ -	$ 1,236,986	$ -	$ 1,236,986

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

No fair value measurements were determined using significant unobservable inputs (Level 3). Level 3 securities trade in less liquid or illiquid markets with limited or no pricing information. The valuation relies on management's judgment concerning the discount rate used in calculating expected cash flows, credit quality, industry sector performance and expected maturity.

(3) The Company's policy is to recognize transfers in and transfers out of the fair value hierarchy levels as of the actual date of the event or change in circumstances that caused the transfer.

(4) Valuation techniques and inputs used in Fair Value Measurements for Level 2:

Derivative Instruments - The fair value of derivative assets is based upon valuation pricing models and represents what the Company would expect to receive or pay at the balance sheet date if the Company cancelled the options, entered into offsetting positions, or exercised the options. Fair values for the options are determined externally by an independent actuarial firm using market observable inputs, including interest rates, yield curve volatilities, etc. Credit risk related to the counterparty is considered when estimating the fair values of the options. However, the Company is largely protected by collateral arrangements with counterparties.

G. Subprime Mortgage Related Risk Exposure

1. Exposure to subprime mortgage risk is defined through the classification of collateral. Subprime collateral is defined based upon various collateral attributes, certain issuers and the spread at the time of origination (SATO) which includes the following characteristics;
   - Loan to values ratios on these loans tend to be higher (80% to 125%).
   - FICO scores are in the lower range. (FICO scores range from 300 to 800, 620 and below is typically considered sub prime)
   - No documentation or low documentation
   - The borrower's rate at the time of origination is much higher than the conforming rate at the time which is referred to as spread at the time of origination
   - Debt to income ratios on these borrowers also tend to be higher
   - In the past there were some issuers whose sole loan origination was subprime loans.
   - Since poorer quality loans typically have higher losses the amount of subordination on a package of subprime loans is much higher than that of prime collateral.

   In monitoring subprime exposure, the credit as well as the structure is monitored, stressed and evaluated. If the monitoring determines that there is current or potential cash flow deterioration, the subprime exposure is evaluated as to how the impaired value due to the cash flow deterioration contrasts to the market value of the security. The decision to sell the security and realize the loss or hold the security and recognize the unrealized loss is dependent upon the results of that evaluation.

   The subprime risk exposure is mitigated by the active monitoring of the portfolio and by limiting holdings to asset backed securities with credit enhancement features.

2. Direct exposure to subprime mortgages through investments – None

3. The Company has direct exposure through other investments:

	Actual Cost	Book/Adjusted Carrying Value (excluding interest)	Fair Value	Other Than Temporary Impairment Losses Recognized

H. Retained Assets

(1) Retained Asset Accounts represent the settlement of life insurance and annuity proceeds via an interest bearing account provided by the Company for the benefit of the beneficiaries. The beneficiary has complete control of and immediate access to the funds in this account. The Company's Retained Asset Accounts are held and administered by its parent, FGLIC. The Company transferred cash equal to the life insurance or annuity proceeds to FGLIC when the beneficiary elected the Retained Asset Account settlement option, therefore, the Company does not report a liability for Retained Asset Accounts on its Balance Sheet. In November 2009, the Company discontinued offering the Retained Asset Account as a settlement option. Interest rates paid to the Retained Asset account holders from January 1, 2012 through December 31, 2012 were 1.0%. The Company does not charge fees related to the Retained Asset Accounts.

31. Reserves for Life Contracts and Annuity Contracts

NOTES TO THE FINANCIAL STATEMENTS

(1) The Company waives deduction of deferred fractional premiums upon death of the insured and returns any portion of the final premium beyond the date of death. Surrender values are not promised in excess of the legally computed reserves.

(2) The extra reserve for table rated extra premiums on permanent insurance is based on the extra premium and the year of issue of the contract. Factors varying from 0.20 for the first policy year to 6.64 for the twentieth policy year are applied to the premiums. The extra reserves secured in this manner are approximately equivalent to the additional reserves needed for substandard mortality and are assumed to represent the increased mortality of these substandard risks.

The extra reserve liability for table rated extra premiums on term insurance and for flat extra premiums on all insurance is taken as one-half of the extra annual premium for the insurance in force with these extra premiums. This is done on the assumption that the risks covered by the extra premium will have extra mortality that remains constant or decreases with increases in attained age.

Mean reserves on our currently sold term insurance are based on appropriate multiples of standard rates of mortality.

(3) At December 31, 2012, the Company had $308,454,256 of insurance in force for which the gross premiums are less than the net premiums according to the standard of valuation set by the State of New York.
