NOTES TO THE FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies

A. Accounting Practices

The financial statements of Fidelity and Guaranty Life Insurance Company of New York ("the Company") are presented on the basis of accounting practices prescribed or permitted by the New York State Department of Financial Services ("NYDFS").

The NYDFS recognizes only statutory accounting practices prescribed or permitted by the State of New York for determining and reporting the financial condition and results of operations of an insurance company and for determining its solvency under New York Insurance Law. The National Association of Insurance Commissioners' ("NAIC") Accounting Practices and Procedures Manual, version effective January 1, 2001, ("NAIC SAP") has been adopted as a component of prescribed or permitted practices by the State of New York. The Company follows these prescribed practices and does not use other permitted practices and, as such, there is no Risk Based Capital effect.

A reconciliation of the Company's net income and capital and surplus between NAIC SAP and practices prescribed and permitted by the State of New York is shown below:

NET INCOME	State of Domicile	6/30/2014	12/31/2013
(1) Fidelity & Guaranty Life Insurance Company of New York state basis (Page 4, Line 35, Columns 1 & 3)	New York	$ 1,651,648	$ 1,273,492
(2) State Prescribed Practices that increase/(decrease) NAIC SAP:		-	-
(3) State Permitted Practices that increase/(decrease) NAIC SAP:		-	-
(4) NAIC SAP (1 - 2 - 3 = 4)	New York	$ 1,651,648	$ 1,273,492

(5) Fidelity & Guaranty Life Insurance Company of New York state basis (Page 3, Line 38, Columns 1 & 2)	New York	$ 63,369,235	$ 61,874,753
(6) State Prescribed Practices that increase/(decrease) NAIC SAP:		-	-
(7) State Permitted Practices that increase/(decrease) NAIC SAP:		-	-

5. Investments

D. Loan-Backed and Structured Securities

(1) Prepayment assumptions for single class and multi-class mortgage-backed and asset-backed securities were obtained from dealer survey values and are consistent with the current interest rate and economic environment.

(2) The Company did not recognize any other-than-temporary impairments during the six months ended June 30, 2014 related to the intent to sell the security or the Company not having the intent and ability to retain the security until its amortized cost is recovered.

(3) For the six months ended, June 30, 2014, the Company did not recognize any other-than-temporary impairments ("OTTI") as the present value of cash flows expected to be collected are less than the amortized cost basis of these securities:

(4) The following table presents the unrealized loss aging for the Company's investments in loan-backed and structured securities at June 30, 2014 by length of time the security was in a continuous unrealized loss position.

a) The aggregate amount of unrealized losses:

1.	Less than 12 Months	$ 39,752
2.	12 Months or Longer	$ 408,946

b) The aggregate related fair value of securities with unrealized losses:

1.	Less than 12 Months	$ 5,088,555
2.	12 Months or Longer	$ 12,161,224

(5) If the fair value of a loan-backed or structured security is less than its amortized cost basis at the balance-sheet date, the Company determines whether the following circumstances exist and, if so, recognizes an other-than-temporary impairment loss:

- If the Company intends to sell the security or does not have the intent and ability to retain the security until its amortized cost is recovered, the security is other-than-temporarily impaired. A realized loss is recognized for the entire difference between the security's amortized cost and its fair value at the balance-sheet date.

- If the Company does not expect to recover the entire amortized cost from the present value of the security's future cash flows, it cannot assert it has the ability to recover the security's amortized cost even though it has no intent to sell and has the intent and ability to retain. The security is therefore other-than-temporarily impaired. A realized loss is recognized for the non-interest-related decline, which is the difference between the security's amortized cost and the present value of cash flows expected to be collected.

20. Fair Value Measurements

A. The Company's measurement of fair value is based on assumptions used by market participants in pricing the asset or liability, which may include inherent risk, restrictions on the sale or use of an asset or non-performance risk, which may include the Company's own credit risk. The Company's estimate of an exchange price is the price in an orderly transaction between market participants to sell the asset or transfer the liability ("exit price") in the principal market, or the most advantageous market in the absence of a principal market, for that asset or liability, as opposed to the price that would be paid to acquire the asset or receive a liability ("entry price").

(1) Fair Value Measurements at June 30, 2014:

(1) Description	(2) (Level 1)	(3) (Level 2)	(4) (Level 3)	(5) Total
Asset at fair value:				
Derivative instruments - assets	$ -	$ 4,076,218	$ -	$ 4,076,218
Total assets at fair value	$ -	$ 4,076,218	$ -	$ 4,076,218

(2) Fair Value Measurements in (Level 3) of the Fair Value Hierarchy

No fair value measurements were determined using significant unobservable inputs (Level 3). Level 3 securities trade in less liquid or illiquid markets with limited or no pricing information. The valuation relies on management's judgment concerning the discount rate used in calculating expected cash flows, credit quality, industry sector performance and expected maturity.

(3) The Company's policy is to recognize transfers in and transfers out of the fair value hierarchy levels as of the actual date of the event or change in circumstances that caused the transfer.

(4) Valuation techniques and inputs used in Fair Value Measurements for Level 2:

Derivative Instruments - The fair value of options is based upon valuation pricing models and represents what the Company would expect to receive or pay at the balance sheet date if the Company cancelled the options, entered into offsetting positions, or exercised the options. Fair values for the options are determined externally by an independent actuarial firm using market observable inputs, including interest rates, yield curve volatilities and other factors, and therefore the assets are classified as Level 2. Credit risk related to the counterparty is considered when estimating the fair values of the options. However, the Company is largely protected by collateral arrangements with counterparties.
