Exhibit 99.2

Investor Supplement
Fourth Fiscal Quarter 2014
(Fiscal Year Ended September 30, 2014)

The financial statements and financial exhibits included herein are unaudited. These financial statements and exhibits should be read in conjunction with the Company's periodic reports on Form 10-K, Form 10-Q and Form 8-K. The results of operations for interim periods should not be considered indicative of results to be expected for the full year.

Non-GAAP Financial Measures

This document contains non-GAAP financial measures to analyze the Company's operating performance for the periods presented. Because the Company's calculation of these measures may differ from similar measures used by other companies, investors should be careful when comparing the Company's non-GAAP financial measures to those of other companies.

Immaterial Revision to Previously Issued Financial Statements

In 2014, Fidelity & Guaranty Life (the "Company") corrected an immaterial error related to a consolidating elimination entry impacting the Consolidated Balance Sheet and Consolidated Statement of Changes in Shareholders' Equity as of and for the year ended September 30, 2013. Intangible assets and retained earnings were decreased by $40.5 and $26.3, respectively and deferred tax assets were increased by $14.2 by this change. This immaterial revision had no impact in the Consolidated Statements of Operations or Comprehensive Income or the Consolidated Statement of Cash Flows. For more information about this change refer to Note 2 of our Consolidated Financial Statements included in our Form 10-K.

Any prior period balances or ratios impacted by this revision have been denoted with an (*) tickmark.

NON-GAAP FINANCIAL MEASURES

AOI is a non-GAAP economic measure we use to evaluate financial performance each period for the periods subsequent to the FGLH Acquisition. AOI is calculated by adjusting net income to eliminate (i) the impact of net investment gains including OTTI losses recognized in operations, but excluding gains and losses on derivatives, (ii) the effect of changes in the rates used to discount the FIA embedded derivative liability, (iii) the effect of change in fair value of reinsurance related embedded derivative, (iv) the effect of class action litigation reserves and (v) residual net income of distributed subsidiaries we no longer own. All adjustments to AOI are net of the corresponding VOBA, DAC and income tax impact related to these adjustments as appropriate. While these adjustments are an integral part of the overall performance of FGL, market conditions impacting these items can overshadow the underlying performance of the business. Accordingly, we believe using a measure which excludes their impact is effective in analyzing the trends of our operations. Our non-GAAP measures may not be comparable to similarly titled measures of other organizations because other organizations may not calculate such non-GAAP measures in the same manner as we do.

In the second quarter of 2014, we revised our definition of AOI from a pre-tax basis to an after-tax basis to better reflect the basis on which the performance of our business is internally assessed. AOI now includes interest expense and an effective tax rate of 35% is now applied to reconciling items made to net income. All prior periods presented have been revised to reflect this new definition. Additionally, during the second quarter of 2014 we revised our definition of AOI to exclude the effect of class action litigation reserves, net of the corresponding VOBA, DAC and income tax impact related to these adjustments. This change has been reflected in the current period calculation. Lastly, during the second quarter of 2014 we revised our definition of AOI to exclude residual net income of distributed subsidiaries; specifically the portion of Front Street Re income not already accounted for in the AOI adjustments above. From the inception of the reinsurance treaty on December 31, 2012 through August 9, 2013, Front Street Re was a fully consolidated subsidiary of FGL. On August 9, 2013 in preparation for the IPO, FGL distributed this subsidiary to its parent company. Adjusting for this distribution provides a better view of the underlying performance of FGL as it is now structured post-IPO.

Together with net income we believe AOI provide meaningful financial metrics that help investors understand our underlying results and profitability. Our AOI may not be comparable to similarly titled measures of other organizations because other organizations may not calculate AOI in the same manner as we do.

Summary of Adjustments to Arrive at AOI (Unaudited)

Quarterly Average ROE	September 30, 2014	June 30, 2014	March 31, 2014	December 31, 2013	September 30, 2013
Return on average shareholder's equity, excluding AOCI (c), (*)	12.0%	18.1%	8.2%	15.4%	41.5%
Adjusted Operating ROE, excluding AOCI (d), (*)	8.6%	11.3%	15.8%	9.0%	29.9%
Debt-to-Capital Ratios: (e)					
Long-term debt/Total capitalization excluding AOCI (*)	18.6%	19.1%	19.7%	20.0%	22.6%

(a) Total capitalization, total stockholders' equity and book value per share excluding AOCI (a non-GAAP financial measure) are based on stockholders' equity excluding the effect of AOCI. Since AOCI fluctuates from quarter to quarter due to unrealized changes in the fair value of available for sale investments, we believe these non-GAAP financial measures provide useful supplemental information.

(b) Book value per share including and excluding AOCI is calculated as total stockholders' equity and total stockholders' equity excluding AOCI divided by the total number of shares of common stock outstanding.

(c) Return on Equity, excluding AOCI is a non-GAAP measure. It is calculated by dividing net income by total average equity excluding AOCI. Average equity excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average equity is calculated using the beginning and ending equity for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized.

(d) Adjusted Operating ROE, excluding AOCI is a non-GAAP measure. It is calculated by dividing AOI by total average equity excluding AOCI. Average equity excluding AOCI for the twelve months rolling, is the average of 5 points throughout the period and for the quarterly average equity is calculated using the beginning and ending equity for the period. For periods less than a full fiscal year, amounts disclosed in the table are annualized.

(e) Debt-to-capital ratios are computed using total capitalization excluding AOCI. Adjusted debt includes the total senior unsecured debentures.

Financial Strength Ratings

	S&P	A.M. Best	Moody's	Fitch
As of Date of Financial Supplement

Net Investment Spread Results

(Dollars in millions)	Three Months Ended September 30,		Twelve Months Ended September 30,	
	2014	2013	2014	2013
Yield on average assets under management "AAUM" (at amortized cost)	4.78%	4.58%	4.64%	4.31%
Less: Interest credited and option cost	2.94%	3.07%	2.94%	3.00%
Total net investment spread - All product lines	1.84%	1.51%	1.70%	1.31%
FIA net investment spread	3.01%	2.42%	2.84%	2.42%
Investment book yield - bonds purchased during the period	4.92%	2.94%	4.87%	2.93%
AAUM (a)	$ 16,799.0	$15,528.6	$16,354.4	$16,311.9
AAUM excluding FSR (b)	N/A	$15,528.6	N/A	$15,709.0

(a) AAUM is the sum of (i) total invested assets at amortized cost, excluding derivatives; and including (ii) related party loans and investments and (iii) cash and cash equivalents at the end of each month in the period divided by the number of months in the period.

(b) AAUM excluding FSR, removes the impact of the Front Street Re funds withheld assets in the prior year AAUM calculation.
